

Grooming Reimagined

*Solutions for Faster, & Healthier
Professional Grooming*

Our Mission

At XPOWER, our goal is to make every pet groomer's life easier. We understand that pet grooming is an arduous and difficult job that requires an unwavering commitment to perfection. Because of their incredible dedication, pet groomers work long hours using noisy equipment in risk-filled environments. Over time, these conditions lead to health issues, endangering groomers' lives. Furthermore, unclean environments simply look and smell bad, affecting clients and decreasing customer satisfaction.

That is why XPOWER created a complete series of products designed to eliminate the dangers of grooming while increasing customer satisfaction and usability. Our products are safe, high quality, and affordable. Whether you are a professional groomer or a do-it-yourself pet owner, you will find that XPOWER's revolutionary products work together seamlessly to produce an ideal drying solution tailored to your needs. We invite you to join us on our journey toward the future of pet grooming.

Precision Manufacturing

With over 25 years of experience, XPOWER remains the leader in innovation and development of pet drying tools and air care equipment. As a true manufacturer, we make every product in-house, from highly balanced motors to durable and lightweight injection-molded housing. This allows us to ensure product quality while keeping our prices competitive, making us the best choice for pet groomers everywhere.

CLEAN GROOM

Modern Pet Grooming Equipment

We created CleanGroom as a complete pet grooming solution with the health and business needs of groomers in mind. Breathing in dander, hair, carbon dust, and other airborne contaminants for hours at a time can cause lung disease and increase mortality in groomers, clients, and pets. Furthermore, the ever-present odor and humidity create an unpleasant client experience, harming future business.

CleanGroom solves these problems by addressing them head-on. XPOWER's Commercial Grade Air Purifiers filter airborne contaminants, producing a safer environment for grooming. XPOWER's Air Neutralizing Fans pump ozone throughout the grooming space, effectively neutralizing bacteria, viruses, and odors. XPOWER's Scented Air Movers fill the room with fresh scents, delivering a positive client-centric experience. XPOWER's Dehumidifiers extract excessive moisture in the air and lower the indoor humidity to a comfortable level. Together, with our revolutionary DC brushless motor dryers, CleanGroom offers a healthier and faster grooming solution for all.

CleanGroom Essentials

Carbon Dust Free Dryers

If you've ever changed the brushes on your force dryer, this should look familiar to you.

Pet dryers are traditionally powered by motors equipped with carbon brushes. Just like the brake pads on your car, these brushes wear out over time and need to be replaced. As the carbon brushes wear out, they leave behind the carbon dust seen on the towel pictured below.

Conventional Brushed Motor Force Dryer

How does carbon dust affect grooming and health?

Force dryers blow out carbon dust into the air which becomes embedded in pet fur. This contaminates the pet's newly cleaned coat and will irritate its eyes and skin.

Furthermore, the groomer and pet will inhale this black powder, leading to nose, throat, and lung irritation.

Carbon Dust Free Dryer with DC Brushless Motor

These health and maintenance issues inspired us to create our brushless motors, an affordable solution that eliminates carbon dust entirely from the drying process. Our motors are quieter, more reliable, and have a six-fold increase in service life compared to traditional brush motors. By using our innovative dryers, groomers can be sure to work in a safe and clean environment while delivering the best experience to pets and clients alike.

CleanGroom Air Care

Keeping a grooming operation clean is no small task, but it can both improve working conditions and build revenues. No matter how talented the groomer, if a grooming salon doesn't look and smell clean, clients will take their pets elsewhere.

XPOWER CleanGroom Air Care equipment can help you achieve a distinctly fresh and clean business environment with minimal effort. Whether the issue is dog fur, dander, dust, airborne allergens, odor or humidity, XPOWER has the solution. Upgrade your salon with our modern equipment and you'll feel the difference.

Air Filtration HEPA Air Purifiers

One issue that more pet groomers have become aware of in their career is the higher risk of respiratory issues.

Common Respiratory Issues:

RUNNY NOSES

NASAL
CONGESTION

ITCHY RED
EYES

CHRONIC
COUGHING

WHEEZING,
SHORTNESS
OF BREATH

Pet grooming professionals are in danger of inhaling all types of contaminants, such as dog fur, dander, dust, bacteria, viruses, and fungi. In addition, the smell of wet dogs in grooming salons turns off customers and discourages them from returning.

With the power of air filtration using the XPOWER Air Purifier, heavily-contaminated environments like grooming salons, pet daycares, and vet clinics no longer need to suffer unhealthy air.

This commercial-grade line of air filtration equipment features a powerful motor capable of drawing a large amount of air through its 4-stage filtration process:

4-Stage Filtration Process:

Stage 1 - A washable nylon pre-filter that captures hair, and is easy to clean and install

Stage 2 - An additional nylon filter to extend the life of the 3rd and 4th stage filters

Stage 3 - An activated carbon filter that helps absorb odors and harmful chemical fumes

Stage 4 - A HEPA filter that captures airborne contaminants as small as 0.3 microns such as pet dander, dust mites, mold, bacteria and virus with 99.97% efficiency

With XPOWER Air Purifiers, you can create a healthier working environment and prevent airborne pollutants from making their way into the lungs of your employees, your customers, and of course, their lovable pets.

Explore XPOWER commercial air purifier models on page 30

Odor Removal Air Neutralizing Fan

Odor is a daily issue faced by every grooming business. Pet dander and wet fur cause a lingering smell that turns customers away while creating an uncomfortable and unhealthy environment for pets and groomers. Temporarily masking the odor with something like a deodorizing spray doesn't hide it completely, nor does it address airborne hazards such as bacteria, viruses, and fungi. The underlying problem needs to be dealt with directly.

With XPOWER Air Neutralizing Fans, odor removal and sanitization are no longer a burden. XPOWER's in-house designed and manufactured DC brushless motors develop large amounts of torque to propel the air speed and volume you need for whole room ozone penetration. You can leave the ozone generator on for up to 3 hours of treatment (or less depending on room size) during off-hours or at night, and come back the next day to fresh and sanitary indoor air.

What is ozone and how does it work to remove odor?

Ozone is present in nature, and is constituted by three oxygen atoms (O_3) arranged in a bent structure. Its concentration in the atmosphere is approximately 0.04 parts per million, and it easily decomposes into oxygen (O_2) and one single, very reactive oxygen atom.

Being a powerful oxidant, Ozone is able to react with organic molecules by changing their structure. This is the origin of its bactericidal, virucidal, and fungicidal actions, which are used in odor removal and air/surface disinfection.

Explore Air Neutralizing Fan models on page 34

SAFETY WARNING

The area treated with ozone must be vacated (with no people/pets/plants) during treatment and for a recovery period after ozone treatment ends to allow oxygen to reenter the space. For more information on the safe level of ozone concentration, please visit the US Environmental Protection Agency's website at www.epa.gov

Total Sanitizing ULV (Ultra Low Volume) Cold Fogger

Routine sanitizing methods have always been a big part of the pet industry, and the XPOWER ULV Cold Fogger line is designed to help you sanitize more effectively.

The easy-to-use ULV cold fogger can help you save time and energy while sanitizing. With an evenly-distributed mist of tiny droplets, the fogger delivers spray distances more than 30 feet. Compared to the common spray bottle, this efficient tool offers maximum coverage while using minimum solution.

Aside from disinfecting, this versatile tool can be used for a wide variety of applications whether it's helping you with odor removal or pest control.

XPOWER's ULV cold fogger is ideal for many pet businesses such as:

Veterinary Clinics

Grooming Salons

Rescue Shelters

Pet Boarding Facilities.

XPOWER manufactures a series of ULV cold foggers to suit a variety of needs.

Air Enhancement Scented Air Mover

Scent branding is an innovative way to make your business stand out, and it's a perfect fit for any business that works with animals who, although we love them, don't always smell the best. Better yet, a pleasant and familiar scent will leave a lasting impression on your clients.

The XPOWER Scented Air Mover line is a never-before-seen solution to quickly fill your facility with a signature fragrance. XPOWER's exclusive scents like Lavender Vanilla or Citrus Bliss may even reduce anxiety in your clients' pets.

Featuring a patented refillable fragrance cartridge, select models also include a negative ion generator. Negative-ion-rich environments such as waterfalls and forests are uplifting places that people are drawn to. Why not try to capture some of this magic in your grooming shop?

Alternatively, you may choose to forgo the negative ion generator and opt for models with additional power outlets so you'll always have an electricity source for your smaller grooming tools (e.g. clippers, hand dryers, nail filers).

Explore Scented Air Mover models on page 36

Humidity Control Commercial Dehumidifier

Humidity control is an underrated element of creating a comfortable and effective grooming environment. With XPOWER Commercial Dehumidifiers, pets will dry significantly faster, and this translates into less fatigue for groomers, less discomfort for pets, less wait time for customers, and ultimately, more business.

How does humidity affect grooming?

The relative humidity (Rh) in a bathing area could rise rapidly with each wash. The smaller the bathing/drying space, the more quickly the humidity will rise.

At 100% Rh, the water vapor in the air condenses as liquid on surfaces. The high humidity could lead to various issues, such as foggy or slippery surfaces, rust, mold and mildew, and even breathing problems.

When humidity exceeds 60% saturation, drying is significantly impeded. Regardless of using high velocity dryers, the drying rate will become sluggish unless saturated air is treated to remove the excessive humidity.

The ideal drying environment would have a temperature of 70° - 80° F and a relative humidity of less than 45% Rh. XPOWER recommends using dehumidifiers if the relative humidity in a space is above 60% Rh.

Explore Commercial Dehumidifier models on page 38

Business Solutions

Pet salons face daily threats to short and long-term health and high groomer turnover rates while working in an uncomfortable and contaminated environment, facing increased respiratory ailments and other health and safety concerns.

CleanGroom offers unique solutions for grooming salons to increase employee loyalty and customer trust by creating a cleaner, healthier, and more professional work environment.

PURECLEANSE Overnight Salon Cleaning System

PureCleanse combines proven industrial grade equipment with HEPA/carbon filtration plus low-density ozone controlled by a programmable digital timer, capturing hair, dander, and even the smallest particulate contaminants while sanitizing surfaces automatically without added chemicals.

PUREDRIY Salon Purifying & Drying System

PureDry improves a poor work environment by combining the 4-stage filtration of the HEPA/carbon air purifier and the commercial-grade dehumidifier, this system effectively removes illness-spreading contaminants, both seen and unseen, as well as humidity from the air—thus decreasing drying times by up to 35% and improving the health and comfort of both staff and customers.

FASTCLEANSE Rapid Salon Disinfecting System

FastCleanse is an effective and efficient way for salons to sanitize air and surfaces. The system combines the professional commercial ULV (ultra-low volume) Cold Fogger with PureFX disinfectant solution. The ULV Fogger disperses minimum volume, ultra-fine droplets of PureFX, which stay suspended in the air and on surfaces long enough for disinfection to take place and then quickly evaporate.

PURECLEANSE Overnight Salon Cleaning System

PureCleanse is an automated, overnight solution for maintaining a clean, healthy, and odor-free environment for you and your staff, helping you reduce employee turnover rates and achieve higher customer retention.

Effortlessly maintain a healthier, safer environment. With automated HEPA air filtration and low-density ozone treatment, air and surface sanitizing has never been easier.

- Sanitize Air and Surfaces
- Overnight Treatment
- Fully Automated
- Chemical Free

CleanGroom PureCleanse

Clean air is more important than ever before, and simple sanitizing and wipe downs are not enough. The EPA, ASHRAE and CDC all recommend using portable air purifiers to help reduce airborne contaminants.

HEPA Air Purifier

Effective for airborne contaminants such as fur, dander, dust, and allergens, bacteria and viruses. HEPA (High Efficiency Particulate Air) filters are designed to capture contaminants as small as at 0.3 microns in size with 99.97% efficiency!

Air Neutralizing Fan

The air neutralizing fan applies low density ozone with focused, extended airflow to achieve whole-room circulation. The ozone inactivates viruses, bacteria, and allergens in your entire space and then turns into normal oxygen.

Runs Automatically

Each part of the system runs independently on a fixed schedule so you can start every day with freshly sanitized and deodorized air and surfaces.

- Utilizes a programmable digital timer
- Timer controls two devices independently

Professional Pet Force Dryers

Our Technology

Single-motor (B-4, B-24)

Double-motor (B-25, B-27)

DC Brushless Motor (B-8, B-8S)

XPOWER has developed an extensive line of force dryers that offer a complete spectrum of features satisfying any professional drying need. Modern features like the DC brushless motor empower groomers to expand their business while maintaining a healthier working environment.

ABS Housing

The housings of all XPOWER force dryers are made of ABS, making them lightweight and durable, shock resistant, quieter than metal, and unlikely to get hot to the touch. Made using injection mold technology, they're also seamless and airtight with high quality finishing.

Heavy Duty Hose

XPOWER's B-TPEH8 Heavy Duty Hose is designed for all models of the professional force dryer line.

- ▶ **Durability** – The thermoplastic elastomer material is lightweight with outstanding thermal and material stability, resistant to deformation, high temperatures, acids, UV light, acids, and ozone damage
- ▶ **Flexible** – Reduced stress on your wrists while drying
- ▶ **Safe** – XPOWER screw-on nozzle attachments secure tightly to the hose

Quietness

XPOWER's patented noise-reduction system distributes airflow at the intake, softening the noise to prevent hearing damage and pet anxiety.

Easy-to-Clean Filter System

Each dryer model comes with multiple layers of washable filters that keep debris out of the motor to maintain maximum performance. The filters are easily accessible through a secure screw-off end cap.

ETL/CETL

XPOWER products are ETL/CETL certified and comply with product safety standards in the US & Canada.

B-8 / 8S Elite Series

DC Brushless Motor Force Dryers

CLEANGROOM
Modern Pet Grooming Equipment

The Elite series is our answer to a feature-packed and environmentally friendly product. Both the B-8 Elite and B-8S Elite Plus are the only DC brushless motor force dryers on the market.

- ▶ **CleanGroom Technology:** Eliminates carbon dust, preventing contamination in pet coats and lung irritation during drying
- ▶ **Variable Heat Control:** Get the highest quality finish on difficult coats. Precise control with LED display
- ▶ **Variable Speed Control:** Gentle airflow for sensitive pets and double coats, yet powerful enough for large breeds
- ▶ Most versatile model that can handle all aspects of drying

Single-Motor Force Dryer

2 Heat Setting & Variable Speed Control

360° Rotatable Nozzle
Self-Rising

Can be used with optional accessories, **B-SMK-3** Stand and **B-SCA** directional nozzle arm, as a hands-free unit

The B-24 Thermal Ace has all the features you need while remaining cost-effective. It's great for groomers of all levels, and fits in perfectly next to your grooming table as an all-purpose dryer.

- ▶ **Instant Heat:** High/low options so you no longer need to wait for motor heat
- ▶ **Variable speed control:** Handles all breeds and sizes

B-25 Pro Force Plus

Double-Motor Force Dryer

Variable Speed Control

Self-Rising

B-25 dryer shown with optional stand kit (B-SMK-3)

The B-25 Pro Force Plus is the most energy-efficient double motor force dryer on the market, while offering powerful air speed for mobile grooming vans and in-home appointments where power supply is limited. It is an ideal tool for grooming table use for quick end-drying challenges.

- ▶ Maximum power with an efficient 12 amp max current draw
- ▶ **Variable Speed Control:** Handles all breeds and sizes

B-27 Super Tub Pro

Double-Motor Force Dryer

Variable Speed Control

The B-27 Super Tub Pro is our most powerful force dryer, ideal for drying pets straight out of the bathtub. Remarkably quiet and powerful, the Super Tub Pro helps you achieve faster drying times on large breeds.

- ▶ **Extra Power for Tub-Side:** Expels water from wet, saturated coats quickly while remaining 40% quieter than the nearest competitor
- ▶ **Variable Speed Control:** Handles all breeds and sizes

B-16 / 16S Pro Finisher Series

DC Brushless Motor Finishing Dryers

The XPOWER Pro Finisher series is essential for grooming shops that need a styling finish to provide professional show quality results. With a capacity of 300 CFM air volume, adjustable heat, a built-in anti-static feature, and quiet performance, the XPOWER Pro Finisher series surpasses all other finishing dryers on the market. Groomers can free up their hands to brush and style the most challenging breeds. It's a must-have for professional show dog prep and salons who offer high quality styling.

- ▶ **CleanGroom Technology:** No pet coat contamination, no lung irritation
- ▶ **DC Brushless Motor:** Maximum 300 CFM airflow with high motor speed
- ▶ **Variable Speed Control:** Low to high speed airflow for a great finish on any coat
- ▶ **Variable Heat Control:** Set difficult coats with professional results using precision heating
- ▶ **Anti-Frizz Technology:** Reduce static build-up from brushing

Brushless Motor Cage Dryers

3-hr Timer and
3-Speed Control

CLEANGROOM

Modern Pet Grooming Equipment

Cage Dryers are a vital time-management tool, allowing grooming salons to accommodate more appointments per day. XPOWER Cage Dryers are the reigning champion in air volume production, and deliver safe, room-temperature air to protect pets from dehydration.

- ▶ **CleanGroom Technology:** Eliminates carbon dust, preventing contamination in clean pet coats and lung irritation during drying
- ▶ **Multi-cage Drying Kit (MDK):** Designed to fit snugly on the dryer and direct air into 3 cages simultaneously
- ▶ **Timer:** Fully hands-free option allows you to continue working at the grooming table while cage-drying. The timer can be set for up to 3 hours
- ▶ **3-Speed Control:** Handle pets of varying sizes and noise sensitivity with 3 different airflow options
- ▶ **Filter Kit:** An easy-to-clean washable double filter system prevents hair and other debris from entering, and ensures maximum motor performance

World Champion Groomer
Victor Rosado

Easily Removable &
Washable Filters

3 Airflow Gates

MODEL #	MOTOR	AMP DRAW	AIRFLOW	SPEED	WEIGHT
X-430TF-MDK	1/3 HP	3.8	2000 CFM	3	27 lbs.
X-800TF-MDK	3/4 HP	7.5	3200 CFM	3	35.1 lbs.

Why Not Heated Air?

Unsupervised heated cage drying is extremely harmful, causing dehydration and putting the lives of our pets at risk. XPOWER Cage Dryers only offer safe, room-temperature air. Remember to utilize the 3-hr timer and always monitor your pets!

X-2580 / 3580

Commercial Compact HEPA Air Purifier

XPOWER Compact HEPA Air Purifiers are a commercial grade air filtration system that captures harmful airborne contaminants, providing cleaner and healthier indoor air for grooming salons, vet clinics, pet boarding, and other pet businesses.

5-Speed Control & Filter Change Indicator Light

- ▶ HEPA filter captures particulate matter as small as 0.3 microns (e.g. pet dander, allergens, dust, bacteria, and viruses) with 99.97% efficiency
- ▶ Easy-access outer washable nylon pre-filter reduces HEPA replacement frequency and saves on cost
- ▶ Activated carbon filter absorbs odors and traps pollutants
- ▶ Convenient filter change indicator light alerts you when to replace the HEPA filter
- ▶ Energy efficient – large CFM with low amperage draw
- ▶ Durable housing constructed with ABS material withstands impacts and is built to last

4-stage Filtration System

MODEL #	AMP DRAW	AIRFLOW	SPEED	WEIGHT	FILTRATION STAGE
X-2580	2.8	550 CFM	5	23.6 lbs.	4
X-3580	2.8	600 CFM	5	32.4 lbs.	4

AP-2000 / 2500D

Commercial HEPA Air Filtration System

The AP-2000 series Commercial HEPA Air Filtration System provides a high volume of air filtration for heavy air contamination, or for large indoor spaces where high capacity air exchange is needed. It's powerful enough to filter 2,000 cubic feet of air volume per minute, as well as operating quietly while the space is in use.

- ▶ HEPA filter captures particulate matter as small as 0.3 microns (e.g. pet dander, allergens, dust, bacteria, and viruses) with 99.97% efficiency
- ▶ Dust control pre-filters provide thorough multi-level filtration, while maximizing HEPA filter life
- ▶ With 2000 CFM airflow volume at maximum speed, the AP-2000 series can perform a complete air change in a 1,000 square ft. room in about 5 minutes
- ▶ Energy efficient, large CFM with low amperage draw
- ▶ One-piece durable roto-molded polyethylene housing with casters for easy mobility

MODEL #	AMP DRAW	AIRFLOW	SPEED	DIMENSIONS (in.)	WEIGHT
AP-2000	8.5	2000 CFM	2	40.2 x 29 x 32.3	112.4 lbs.
AP-2500D	8	2000 CFM	Variable	29.4 x 26.7 x 38.8	98.66 lbs.

X-2830 / 3780

HEPA Air Purifier

Sharing a space with adorable pets might sound awesome, but our furry friends tend to carry not-so-adorable allergens and pollutants, causing us to suffer respiratory distress over long-term exposure.

XPOWER HEPA Air Purifiers offer commercial-grade air filtration for the home setting, so that pet owners and their guests can be relieved of allergic reactions caused by pet hair, dander, dust, etc.

- ▶ HEPA filter captures particulate matter as small as 0.3 microns (e.g. pet dander, allergens, dust, bacteria, and viruses) with 99.97% efficiency
- ▶ Activated carbon filter traps odors and pollutants (Model X-2830 & X-3780)
- ▶ Filter change indicator light
- ▶ Durable ABS housing in white easily blends into home decor
- ▶ 24-hour Timer (Model X-2830)
- ▶ High-torque 1/2 HP Motor

M-25 / M-27

Air Neutralizing Fan

XPOWER Air Neutralizing Fans is an easy and effective way to eliminate pet odors. Combined with XPOWER's air propelling technology, ozone can be delivered to every corner to break down pesky smells and freshen the indoor air.

- ▶ **Odor Removal:** Eliminate odors caused by pets, smoke, food, mildew and garbage
- ▶ **Full Room Circulation:** A powerful DC brushless motor with deep pitch fan blades produces a focused, extended airflow and promotes circulation
- ▶ **Ozone Generator:** On/off switch allows you to turn the generator on only when needed; an indicator light shows when the ozone generator is on
- ▶ **Timer:** Can be set for up to 3 hours

Warning: Ozone can be harmful. Please make sure that no PPP (people, pets, or plants) are present in the space that's being treated with ozone, and allow proper ventilation after treatment. Refer to your owner's manual for safety precautions prior to usage.

Fogger Series

ULV Fogging

XPOWER ULV (Ultra Low Volume) Cold Foggers are a multi-purpose tool designed to tackle various issues in grooming salons, vet clinics, rescues, and pet boarding. Whether it's routine cleaning, odor removal, or pest control, the ULV fogger will do the job.

- ▶ **Maximum Coverage:** Delivers a large volume of solution at long distances, thanks to a powerful DC brushless motor
- ▶ **Cost-Effective:** ULV technology reduces costs with lower solution usage
- ▶ **Multi-Purpose:** Sanitize, neutralize odors, and even deal with pests. We recommend using separate foggers for different applications to avoid mixing solutions
- ▶ **Rechargeable:** Maximum portability with a rechargeable battery

Disclaimer: Make sure to use appropriate PPE when necessary. XPOWER does not manufacture solutions and is not responsible for usage of dangerous chemicals. Please refer to your owner's manual for compatible solution types.
