

B-163

HIGH VELOCITY PET DRYER

With the help of the potent XPOWER B-163 High-Speed Pet Dryer, pet owners may get salon-quality results at home. Reaches: 14X the power and air volume of conventional human hair dryers. With 320 CFM of airflow, this dryer makes it easier and more effective to dry large breeds and dense double coats. By adjusting the variable speed control and airflow performance your noise-sensitive pets will have a more relaxing and comfortable drying experience. The B-163 is powerful, lightweight, and two quiet, synchronized motors. These motors contribute to the dryer's high efficiency while being gentle enough for sensitive pets. The dryer comes with an 8-foot flexible hose with heat-proof handles, can easily be maneuvered to dry around your pet's body and prevent the hose from getting too hot during usage.

EASY HOSE INSTALLATION

Connect the hose

Connect the
heat-proof hand grip

Choose and connect
the nozzle

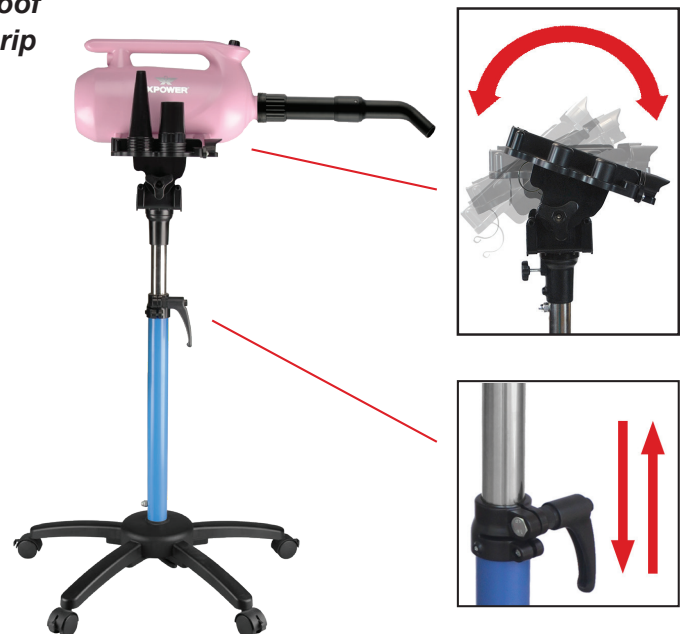

Plug in power and
power on

SPECIFICATIONS

MODEL NO.	B-163
